BAHEP welcomes International SOS Government Medical Services

BAY AREA HOUSTON, TEXAS – Bay Area Houston Economic Partnership (BAHEP) welcomes its newest member, International SOS Government Medical Services (Intl.SOS GMS), International SOS’s specialist business unit which provides medical services in support of the U.S. Government.

President of Bay Area Houston Economic Partnership, Brian Freedman, shared “We are proud to have Intl.SOS Government Medical Services join our organization; their dedication to protecting the global workforce from health and security threats is inspirational.”

Martin Rudd, CEO of Intl.SOS GMS said “In 2022 we established our HQ in Houston and we are proud to be growing and expanding our US and International team from here. Joining BAHEP allows us the opportunity to engage more fully with Houston based organizations, some of whom we are honored to support overseas through our parent. As a medically led company we are committed to providing world-class responsive and flexible medical services to support the U.S. Government both domestically and internationally. We are completely aligned with BAHEP’s dedication to community and world health, and we look forward to the mutual support this collaboration will bring.”

More About International SOS Government Medical Services

Government Medical Services is a business unit of International SOS that is committed to supporting U.S. Federal and State government entities, and the companies who support them both in the country and overseas. Headquartered in Houston, Texas, Government Medical Services partners with governments, private companies, multi-lateral organizations, and NGOs (Nongovernmental Organizations), and is licensed to deliver services in every US state, as well as over 100 counties internationally. As a US subsidiary of an international corporation, GMS is established in compliance with the rules of Foreign Ownership, Control, or Influenced (FOCI) businesses.

Specifically, GMS designs, builds and deploys turnkey medical facilities, medical staff, pharmaceuticals, and equipment; we provide medical training, behavioral and occupational

health services, and immediate access to global aeromedical services.

GMS draws on the footprint of its parent, Intl.SOS, who over 40 years has built a unique global infrastructure to provide immediate medical, security and logistic support to over 9,000 corporations, international organizations or governments. With permanent operations in 90+ countries, and a global network of 91,000 clinics, our 12,000 staff operate from over 1,000 locations. Our teams and clients are coordinated through an interconnected network of 27 assistance centers which collectively respond to some 5 million calls for assistance each year.

We look forward to getting to know BAHEP and its members.
